prevent and slow down
Alzheimer's disease**

You may be able to take part in a clinical study testing
a new treatment for Alzheimer's disease

PrevenTRON

About the PrevenTRON study.

This study is testing a new potential treatment called trontinemab. Participation lasts about **4–6 years** and includes regular clinic visits and phone check-ins to help us closely monitor your health, memory, and thinking.

About **1,600 people** from across the globe will be joining the PrevenTRON study.

Who can take part in this study?

We are looking for people who:

- Are 55 - 80 years old
- Have not been diagnosed with mild cognitive impairment, Alzheimer's disease or dementia
- Are interested in learning about their risk of developing Alzheimer's disease
- Have a partner, relative, or friend who has at least weekly contact with you and is willing and able to attend study visits with you
